

Slip Agent

SL-482 Organic silicone slip and anti-blocking additive

DESCRIPTION SL-482 is a slip and anti-blocking additive with utmost effectiveness. It has excellent slip and anti-blocking properties in topcoat, pigmented and waterborne systems.

TYPE High molecular weight poly dimethyl siloxane

- KEY FEATURES**
- Comparable with Tego 482
 - Excellent anti-stick effect
 - Excellent flowability and leveling property
 - Good compatibility with water based resin and other additives
 - Endow the coating with good hand feeling, water resistant properties

TYPICAL PROPERTIES	Appearance	Milky emulsion
	Nonvolatile matter content (%)	65%
	Density (g/cm³)	0.92-0.97
	pH (25°C)	6-8
	Solubility	Soluble in water

- APPLICATION**
- Water based paint/coating
 - Wood paint
 - Vanish/clear coat
 - Leather coating
 - Printing ink etc.
- Recommended dosage: 0.1-1.0% additive (as supplied) based upon total formulation.

STORAGE

- Available in 25 kg/barrel or 200kg/barrel

AND

- Store products in tightly closed original containers at 5-40°C
- Shelf life: 12 months from delivery date

HANDLING

- According to non-dangerous goods transport
