

FC-109 (CAS 16961-83-4) Fluorosilicic acid**BASIC
INFORMATION**

Name: Fluorosilicic acid
Molecular formula: H₂SiF₆
Molecular weight: 144.09
Boiling point: 108.5°C
CAS NO.: 16961-83-4
EINECS: None
Density: 25°C, 1.32g/cm³

**PRODUCTION
METHODS AND USES**

use
The raw materials for preparing fluorosilicate and silicon tetrafluoride are also used in metal electroplating, wood preservation, beer disinfection, etc.
